Khắc Phục Lỗi " is not accessible" Khi Share Mạng Nội Bộ

- Trước tiên mình phải enable User Guest lên trước.

- Sau đó vào Run gõ gpedit.msc, vô trong Computer Configuration > Windows Settings >Security Settings > Local Policies chọn User Rights Assignment và làm theo những bước sau:

Bước 1: Chọn Access this computer from...ta Add User Guest vào

Access this computer from the network Administrators Backup Operators Everyone Users Add User or Group Add User or Group Add User or Group Modifying this setting may affect compatibility with clients, services, and applications. For more information, see Access this computer from the network. (J823659)	Local Security Setting	Explain
